MBRRACE-UK: Delivering the UK-wide Maternal, Newborn and Infant Clinical Outcome Review Programme

Perinatal Surveillance update

Thank you to everyone who has been entering cases onto the MBRRACE-UK Perinatal Death On-line Surveillance System. By now data for all eligible babies born in 2013 who died should have been entered onto the system. We are currently checking completeness and quality of data and may be in touch with individual reports if we have any questions. We just want to highlight some important messages:

Late fetal losses

Please remember that we are collecting data on babies delivered showing no sign of life between 22^{+0} and 23^{+6} weeks of gestation irrespective of when death occurred. Currently wide variation in the number of cases entered by units is causing concern. Any units with unusually low numbers may be highlighted in the annual report.

2013 open cases

There are a large number of 2013 cases that have not yet been closed. Please complete and close all remaining cases.

Cases entered in error

Please urgently check for any cases entered more than once or other erroneous cases. Email to us the MBRRACE-ID of any cases you would like deleted.

Assigned cases

Please ensure that you enter the requested data for any outstanding cases assigned to you from another Trust or Health Board and return them as soon as possible.

Perinatal Surveillance Report

We are pleased to let you know that the 2013 report will be launched in June 2015. We will confirm the date and venue shortly.

We know that many of you will currently be working very hard to enter any outstanding cases from your unit. The table below lists the Trusts in England, Health Boards in Wales, Hospitals in Scotland and Trusts in Northern Ireland who have entered all their cases born in 2013 by early September 2014 (this applies to the cases registered by parents matched with the MBRRACE-UK cases).
